

## INDEX TO VOLUME 45

### ARTICLES

- Abraham Lincoln, Cedric Foster, 10-12.
- Achievement in Elementary School Science in a Representative Sampling of Minnesota Schools, Jane Johnston, 58-61.
- Adapting Science Instruction in New York City Junior High Schools to the Needs of Puerto Rican Pupils, Carmen Sacarello-Bals Sanguinetti, 172-175.
- Additional Experimental Evidence Supporting Korzybskian Principles, Thomas M. Weiss, 114-118.
- Air Pollution: An Educational Problem, Albert B. Carr, Jr., 245-248.
- America, Herbert Hoover, 5-7.
- Analytic Surveys, Kenneth E. Anderson, 412-417.
- Approach to the Interpretation and Measurement of Problem Solving Ability, An, Joseph D. Novak, 122-131.
- Approaching the Draft of a Policy for Science Teacher Education, John R. Mayor, 191-195.
- Audio-Visual Materials and Fifth Grade Reading Achievement, Clara Minsel, 86-88.
- Audio-Visual Research, Kenneth E. Anderson, 430-436.
- Avenues for the Improvement of Research, Kenneth E. Anderson, 418-424.
- Bibliography for Careers in Mathematics, A, Nura D. Turner, 293-295.
- Brochure to NARST Members, Clarence M. Pruitt, 465-471.
- Business Meeting of Association for the Education of Teachers in Science, 188-189.
- Challenge of New Horizons, The, Hugh Odishaw, 16-20.
- Challenges to the Improvement of Science Education Research, William W. Cooley, 383-387.
- Changes in Student Concepts of Procedures Used in Determining Classroom Experience in a General Science Course, George J. Pallrand, 169-172.
- Charles Edgar Montgomery, Clarence M. Pruitt, 283.
- Clarence Harry Boeck, Clarence M. Pruitt, 93-96.
- Comparison of Inductive and Deductive Methods of Teaching High School Chemistry, A, Sister Ernestine Marie, 436-443.
- Comparison of the Relative Effectiveness of Two Methods of Teaching a Course in Physical Science to Sophomore College Students, Christopher D. Raftor, 164-168.
- Constitution, The Association for the Education of Teachers in Science, 189-191.
- Criteria for Good Experimental Research in the Teaching of Science, Milton O. Pella, 396-399.
- Cultural Science in America, Catherine Bergen, 238-242.
- Definition of Science Education: Curriculum Research, A, Cyrus W. Barnes, 394-396.
- Development and Present Status of School Science Fairs, The, Charles F. Beck, Jr., 360-363.
- Discussion Group Method in Science Education, The, John J. Montean, 227-230.
- Discussion Leader's Report on Group II—"Promoting Interest in Science," Peter Dean, 28.
- Do You Conduct Your Science Laboratory Efficiently? Marc A. Shampo, 224-227.
- Effectiveness of Television in Improving the Science Program of Kindergarten to Grade 4 Classes in New York City Public Schools, The, William B. Reiner, 43-54.
- Evaluation and Follow-up Study of a Summer Science and Mathematics Program for Talented Secondary School Students, William W. Cooley and Robert W. Bassett, 209-216.
- Evaluation of the Adapted Harvey White Physics Films in Turkey, Kenneth G. Nelson and Milton O. Pella, 284-293.
- Evaluation of the Introductory Chemistry Course on Film, An, Kenneth E. Anderson, Fred S. Montgomery, and Sid Moore, 254-269.
- Evaluation of the Introductory Chemistry Course on Film by Factorial Design and Covariance with Method and Career Plans as the Main Variables, An, Kenneth E. Anderson, Fred S. Montgomery, and Dale P. Scannell, 275-278.
- Evaluation of the Introductory Chemistry Course on Film by Factorial Design and Covariance with Method and Sex as the Main Variables, An, Kenneth E. Anderson, Fred S. Montgomery, and Dale P. Scannell, 269-274.
- Experimental Study Involving the Comparison of Two Methods of Performing Experiments in High School Chemistry, Steven J. Mark, 410-412.
- Extent of Mathematics in Integrated Physical Science Textbooks for Secondary Schools, Roger W. Price, 157-161.
- Facilities and Equipment Available for Teaching Science in Public High Schools, 1958-59, Charles L. Koelsche, 365-372.
- Factors Affecting the High School Student's Choice Regarding a Science Career, Maurice Finkel, 153-157.
- Filmed Science Courses in the Public Schools: An Experimental Appraisal, W. James Popham and Joseph M. Sadnavitch, 327-335.
- "For the Record" Follow-up, Clarence M. Pruitt, 177.
- Fundamental Science Course: The Nature of Things, Donald Schwartz, 357-359.
- George Washington, Cedric Foster, 7-10.
- Grand Rapids Study, The, Jacqueline Buck Malinsson, 35-39.
- Group Classifications of Teachers with Evaluative Attitudes Favorable to Science Study, Carl J. Kleyensteuber, 236-237.
- Guybert Phillips Cahoon, Clarence M. Pruitt, 185-186.
- Herbert Andrew Smith, Clarence M. Pruitt, 377-381.
- Hero Image in Education, The, Fletcher W. Watson, 381-383.

- High School Biology and Its Relation to Zoology I at Louisiana State University, Henry James Werner, 233-235.
- I Speak for Democracy, Elizabeth Ellen Evans et al., 68-76.
- Improvement of Astronomy Education (K-16)—Through a State-Wide Program, Roger W. Price, 297-312.
- Improving Elementary Teacher Education in Science, Nathan S. Washton, 33-34.
- Improving the Competence of Teachers In Measurement and Evaluation, Kenneth E. Anderson, 424-429.
- Investigation of Instruction Problems Encountered by Beginning Secondary School Science Teachers in the Pacific Northwest, An, John Stanley Shrader, 143-153.
- Ira Cleveland Davis, Clarence M. Pruitt, 281-283.
- John Gabriel Navarra, Clarence M. Pruitt, 1-4.
- Learning Feedback and Experimental Tension, Bowman C. Collins, 249-250.
- Lessons from Britain, Willard J. Jacobson, 195-200.
- Letter to Herbert A. Smith, J. Darrell Barnard, 463.
- Letter to Science Education, Herbert A. Smith, 464.
- Measurement of Science Interests: An Operational and Multidimensional Approach, The, William W. Cooley and Horace B. Reed, Jr., 320-326.
- Method for Instructing the Nature of the Scientific Enterprise, A, Morris Goran, 231-232.
- Multiple Instruction and Other Factors Related to Achievement in College Physics, Ralph H. Blumenthal, 336-342.
- Music and Radios: A Tool in Chemistry Laboratories, Malcolm H. Filson, 279.
- My Summer Cottage Winter: Lake Elmore, Vermont, Velma F. Huntley, 61-67.
- NARST Citations, Vaden W. Miles, 460-462.
- National Association for Research in Science Teaching Program, 450-453.
- Nerve of a Gall, The, Olive Macdonald, 363-364.
- Official Minutes of the Thirty-Fourth Annual Meeting of the National Association for Research in Science Teaching, Herman A. Branson, 457-458.
- Philosophy of a Professional Amateur, B. Clifford Hendricks, 243-244.
- Planning a Student Teaching Program for Prospective High School Science Teachers, Ralph Lea Beck, 161-164.
- Prediction of Achievement in Junior High School General Science, The, C. Michael Adragiva, 175-176.
- Preparation of High School Science Teachers, 76-85.
- Problem Solving Techniques in Teaching Secondary School Physics, Peter Dean, 399-403.
- Problems in Semantics of Importance in Science Teaching, Albert F. Eiss, 343-347.
- Process-Centered Elementary Science Sequence, A, Glen Heathers, 201-206.
- Program Council for Elementary Science International, 13-15.
- Program Regional Meeting of the Association for the Education of Teachers in Science October 27 and 28, 1960, 188.
- Program to Prepare the Productive Science Teacher, A, David S. Sarner, 206-208.
- Proposals for the Professionalization of a General Science Course for Prospective Junior High School Science Teachers, Frank O. Youkster, 348-353.
- Proposed Science Program for General Education at Castleton Teachers College, Castleton, Vermont, A, Richard Alexander Sleeman, 353-357.
- Purposes, Operation, and Services of a Research Center: An Operational Approach, The, John G. Read, 388-391.
- Radiation Hazards and What Is Being Done About Them, Edith H. Quimby, 251-253.
- Readability of College General Biology Textbooks, The, Alexander G. Major and Alfred T. Collette, 216-224.
- Report on the Relationships of the NARST with the American Association for the Advancement of Science for the Year 1959-60, A, George Greisen Mallinson, 178-183.
- Report to the NARST on the Relationships with the American Association for the Advancement of Science for the Year 1960-61, A, George Greisen Mallinson, 454-456.
- Responsibilities of Those Participating in the Training of Secondary School Science Teachers in the Pacific Northwest, John Stanley Shrader, 138-143.
- Roger Wayne Price, Clarence M. Pruitt, 296-297.
- Social Responsibility of the Science Educator, Robert J. G. Barlow, 373-376.
- Some Phases of Research in the Development of a General Education College Chemistry Course, Luther A. Arnold, 443-449.
- Student's View of Summer High School Chemistry, A, Mary Lynn Burgis, 250-251.
- Study of New Developments in Secondary School Science—Grades 7-12, A, Margaret J. McKibben, 403-409.
- Surveys and Status Studies, Ellsworth S. Obourn, 391-393.
- Teaching Concepts of Modern Astronomy to Elementary-School Children, J. Myron Atkin, 54-58.
- Techniques for Developing Methods of Scientific Inquiry in Children in Grades One Through Six, Louise A. Neal, 313-320.
- Teleology and Elementary Science, Mervin E. Oakes, 40-43.
- Ultimatum: Betrayal of a Loyalty, Clarence M. Pruitt, 473-477.
- Unrealistic Proposal for Grade-School Teacher Preparation in Mathematics, An, Clarence M. Pruitt, 85-86.
- Use of Ecology in Teaching Science to Children, The, Beth Schultz, 96-113.
- Use of Labeled Photomicrographs in Teaching College General Botany, The, Joseph D. Novak, 119-122.

- Varying Characteristics of Children and Their Utilization in Science Education, Emma N. Plank, 20-24.
- Varying Perceptions of Science Phenomena, Katherine E. Hill, 29-32.
- Welcome and a Challenge, A, Paul E. Blackwood, 24-27.
- What Do Children Believe?, William P. Rogers, 131-137.
